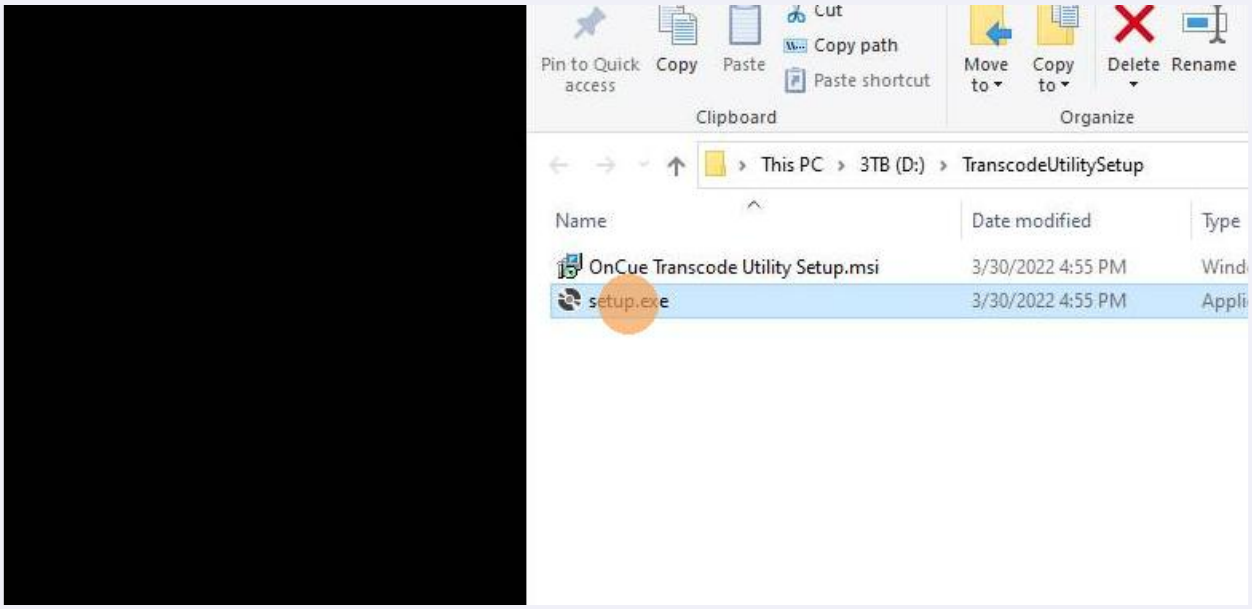
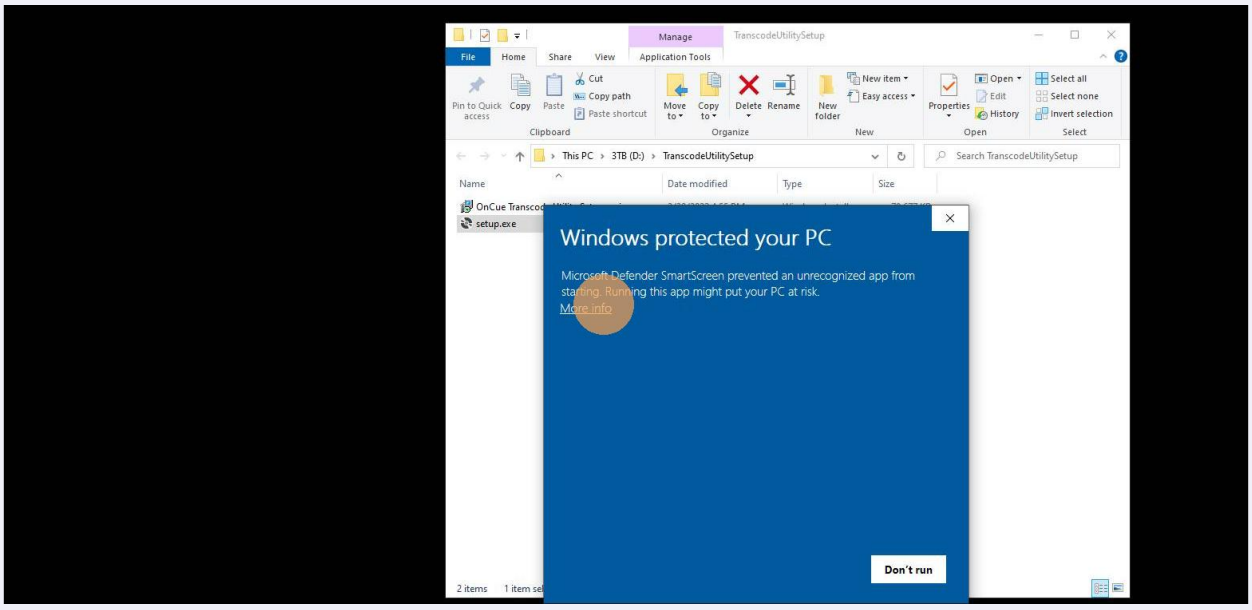
Transcoding How To

1 Click Setup.exe to launch the installer

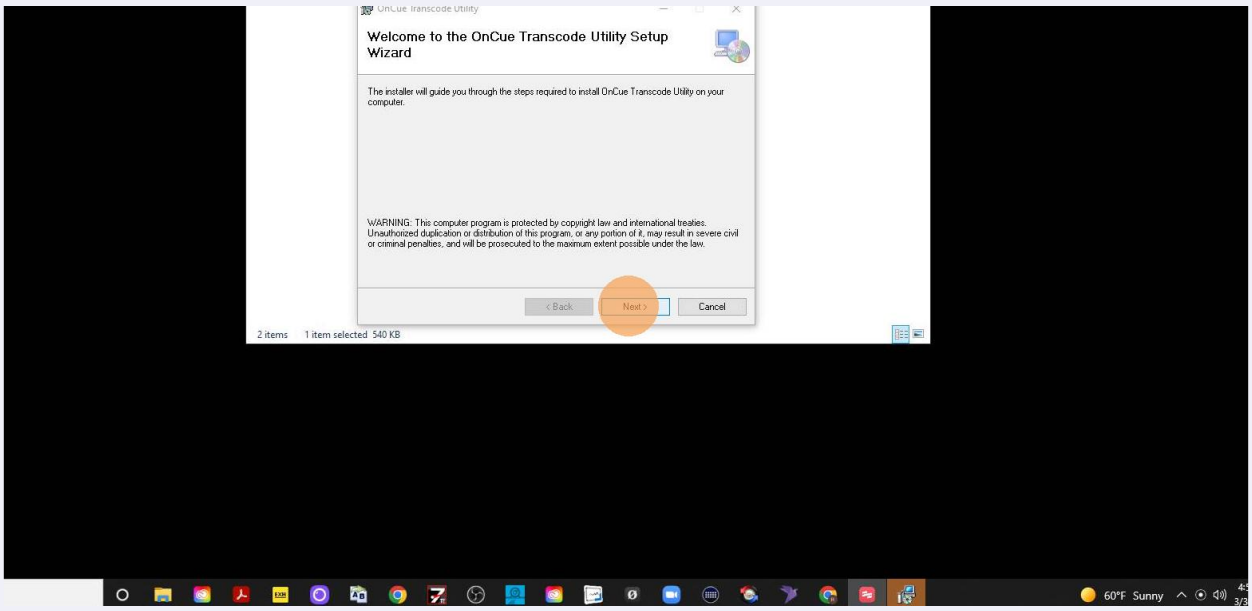


2 Click "More info"

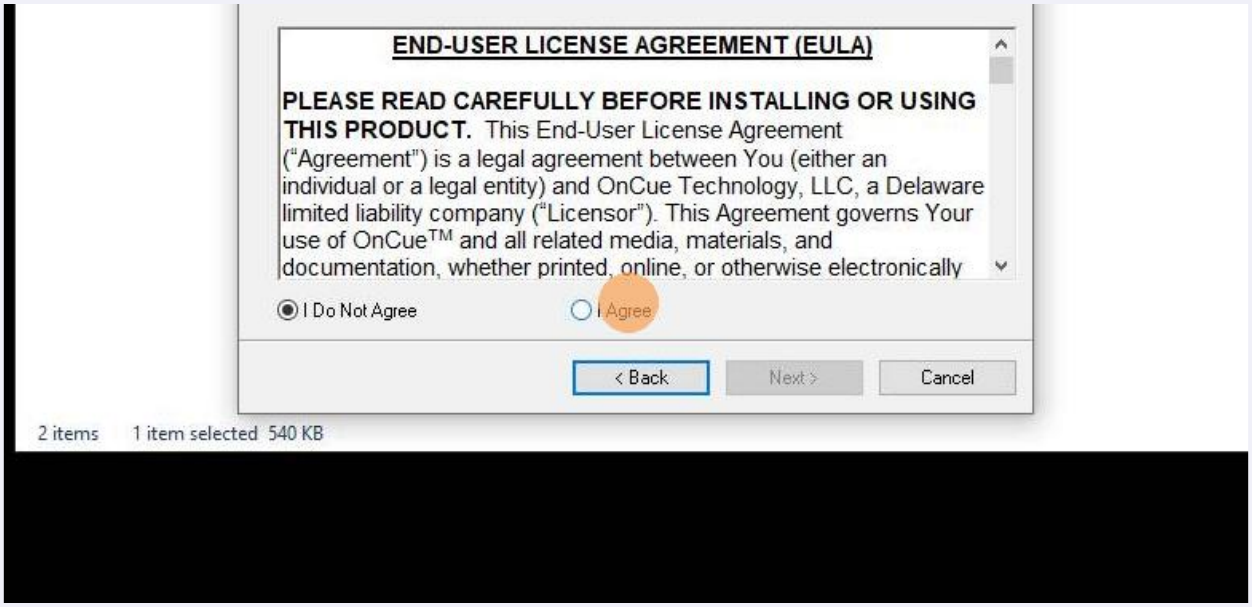


3 Click "Run anyway"

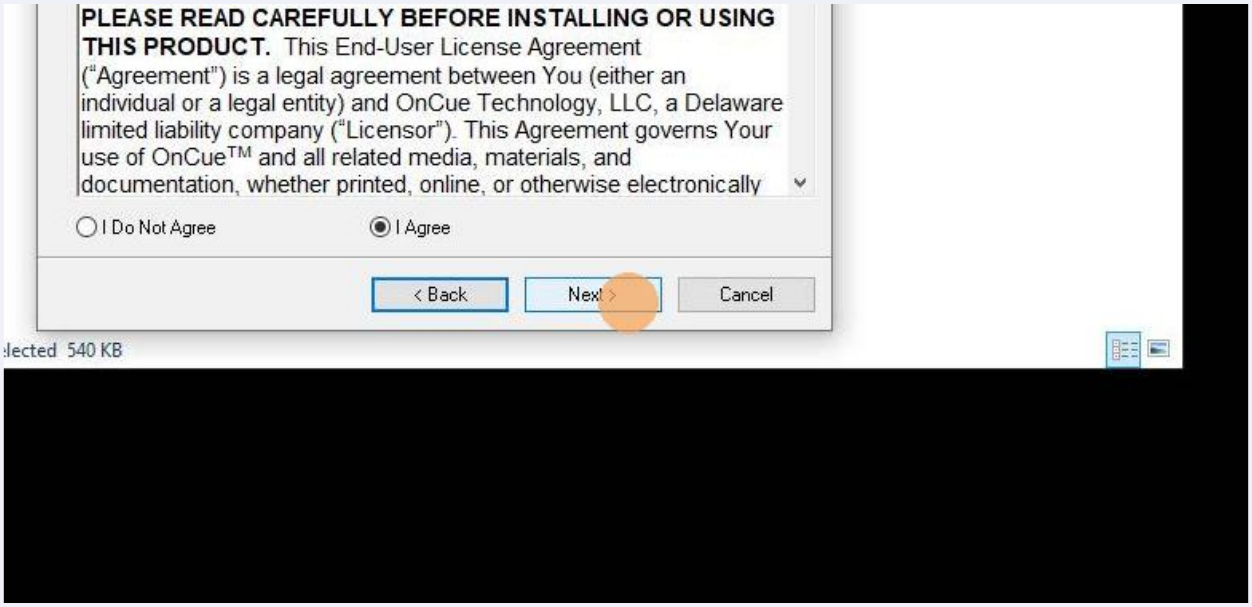
4 Click "Next >"



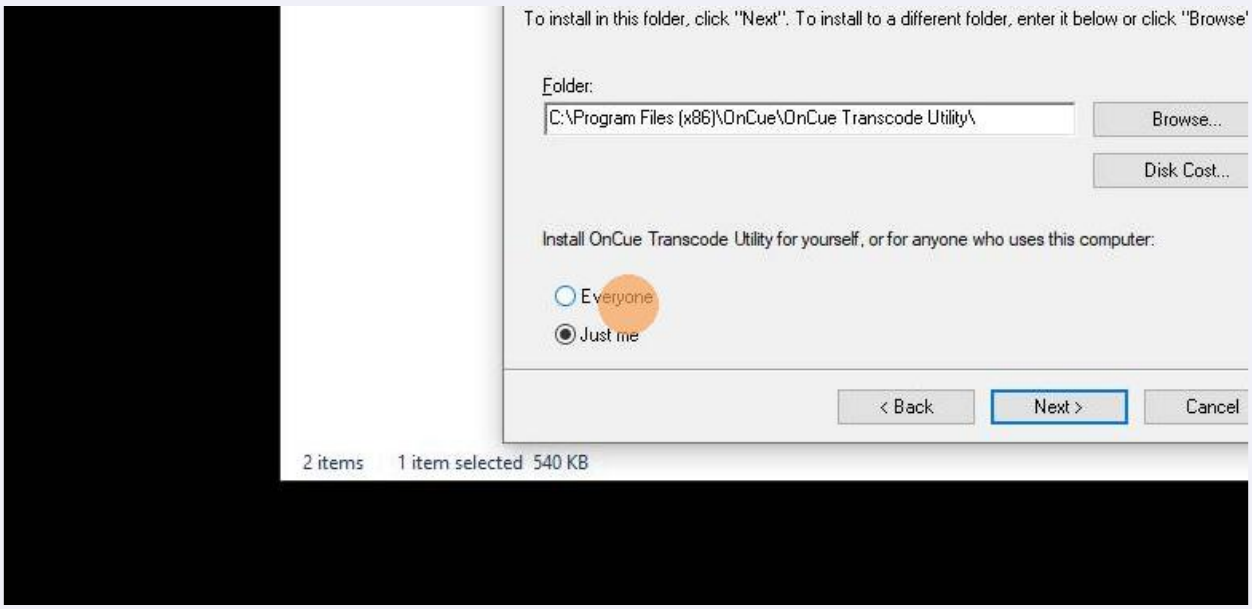
5 Click "I Agree"



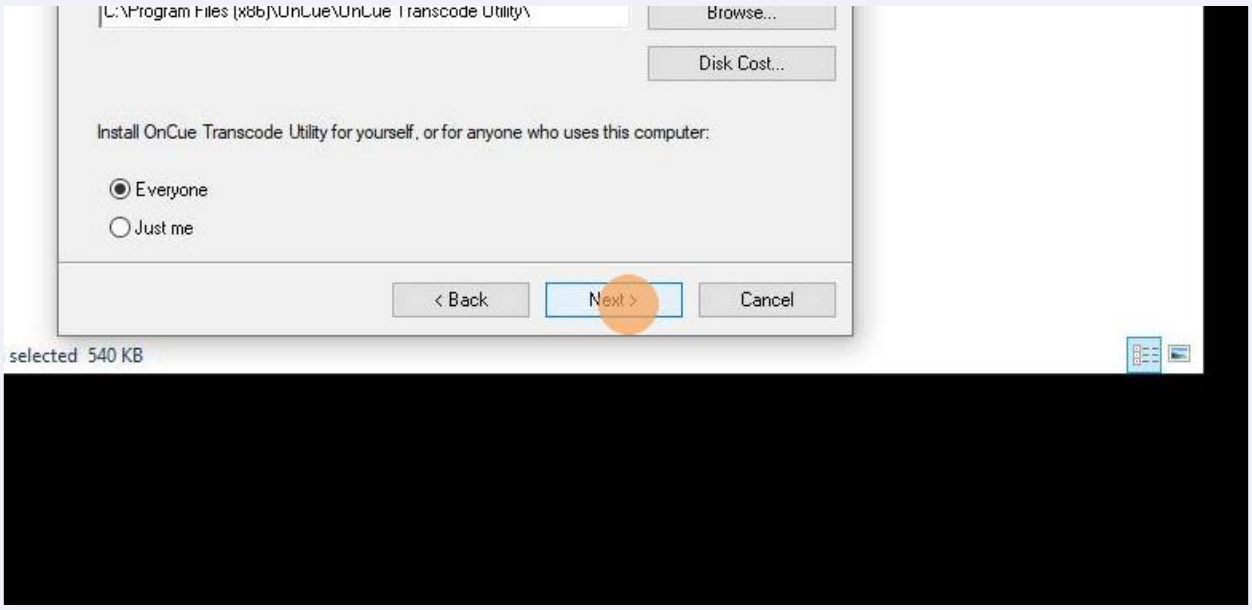
6 Click "Next >"



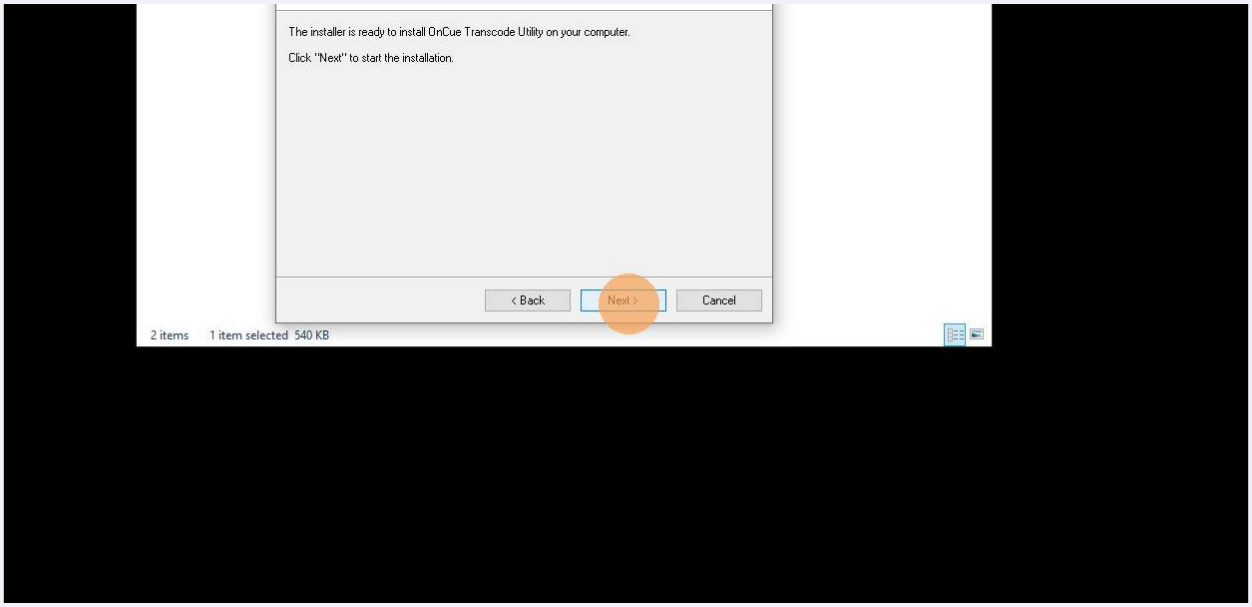
7 Click "Everyone"



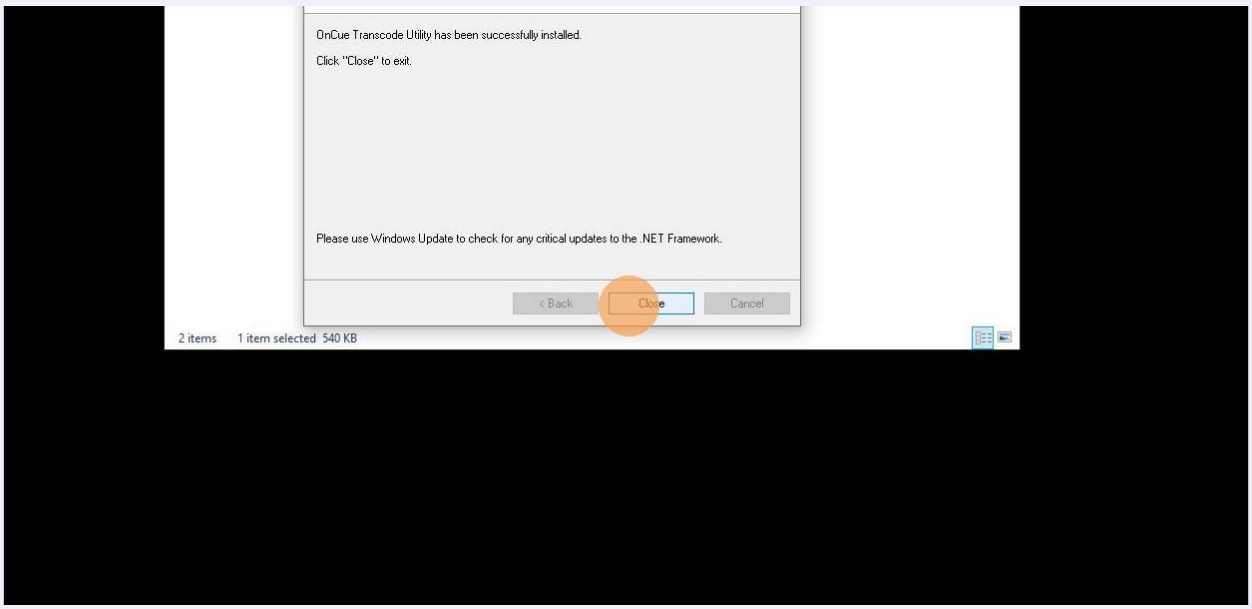
8 Click "Next >"



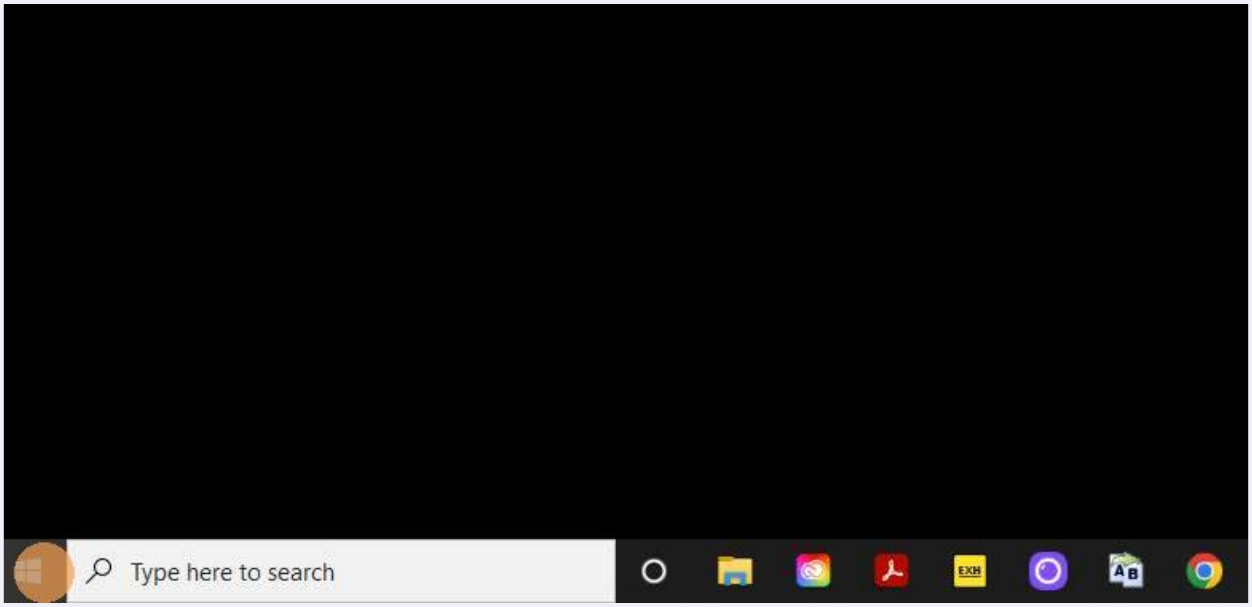
9 Click "Next >"



10 Click "Close"

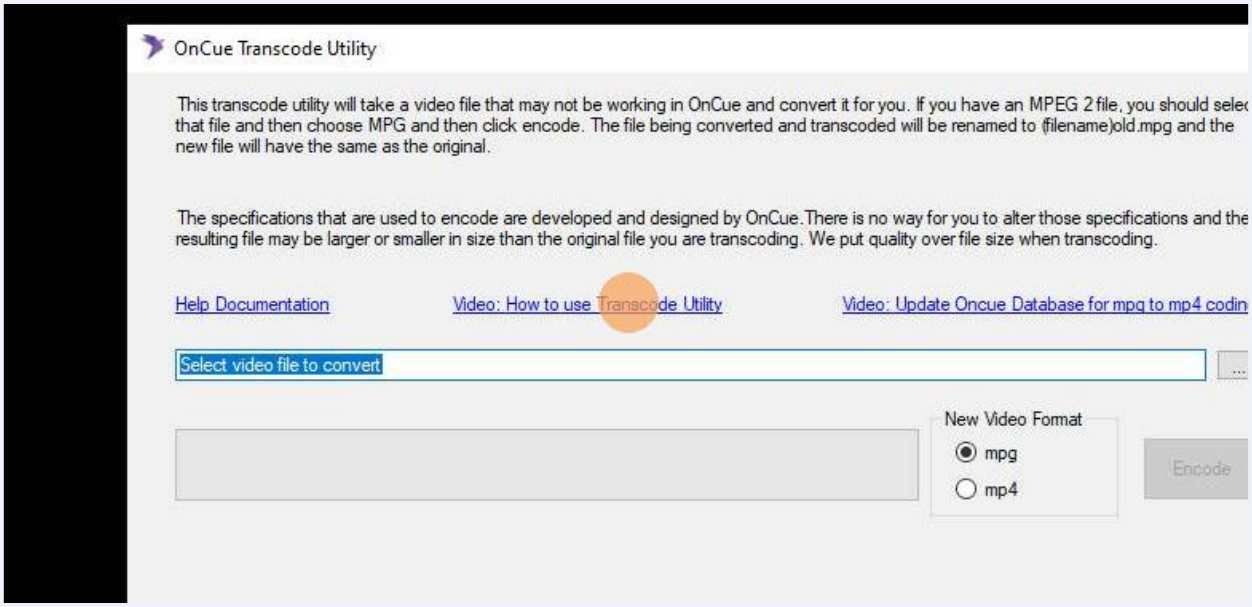


11 Click "Start"

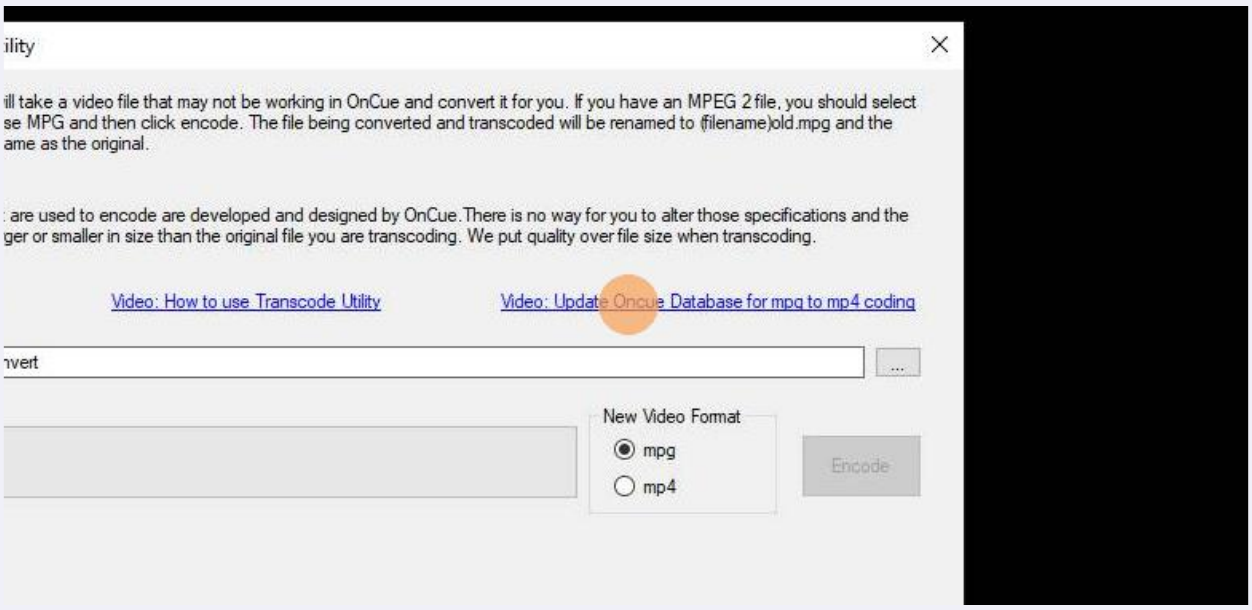


12 Click "OnCue Transcode Utility, New"

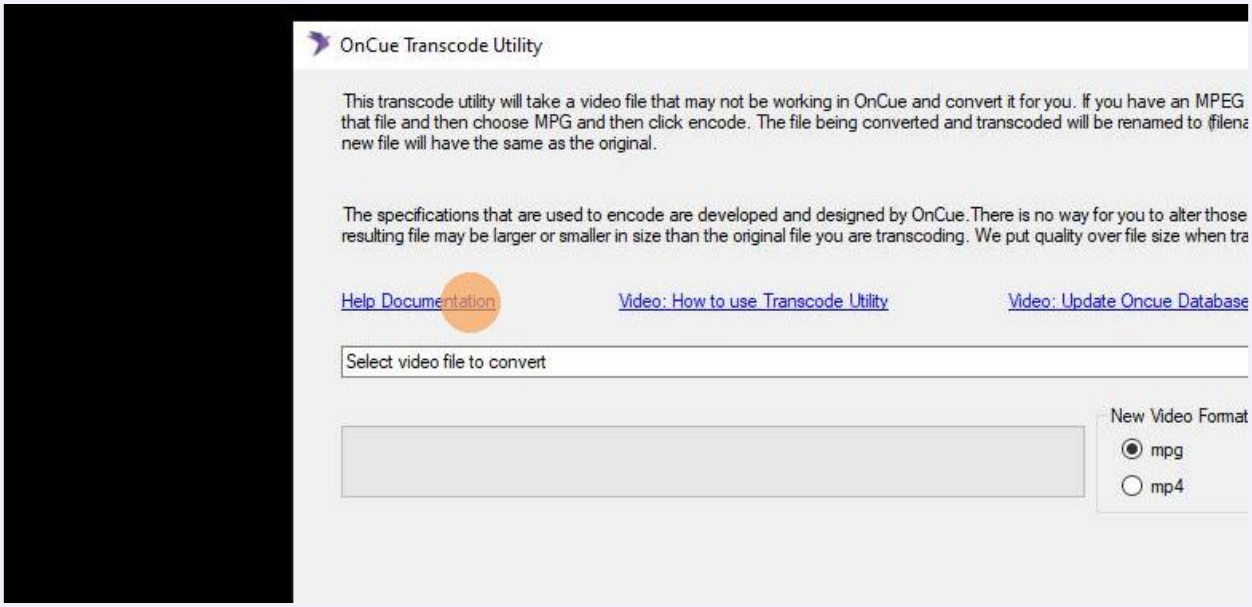
13 Click "Video: How to use Transcode Utility"



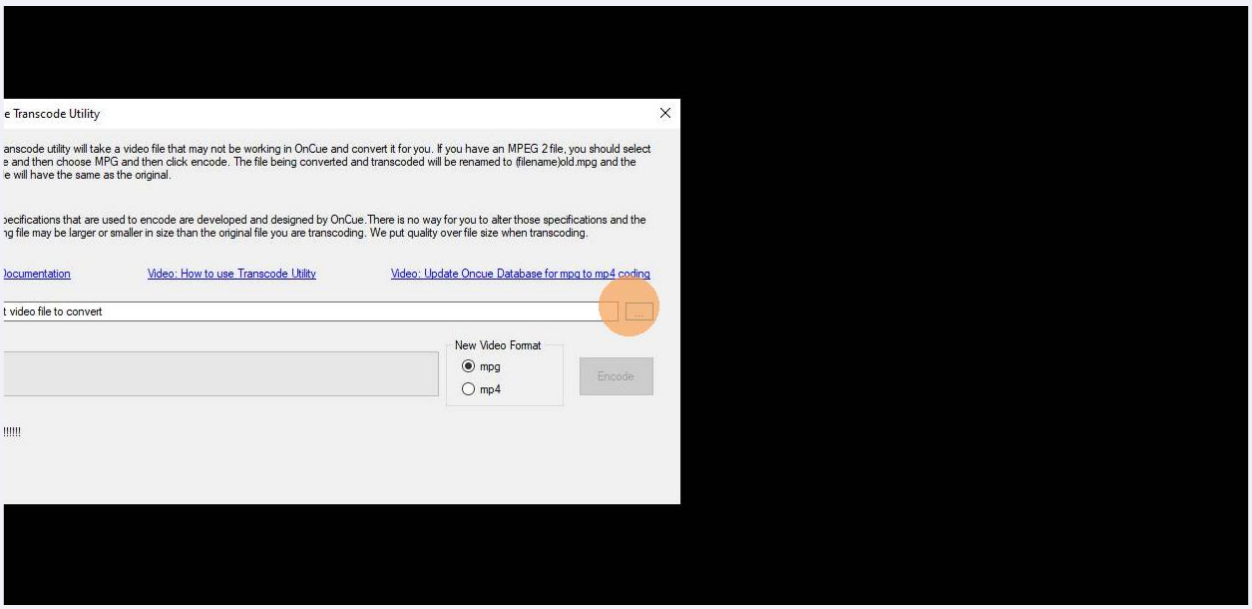
14 Click "Video: Update Oncue Database for mpg to mp4 coding"



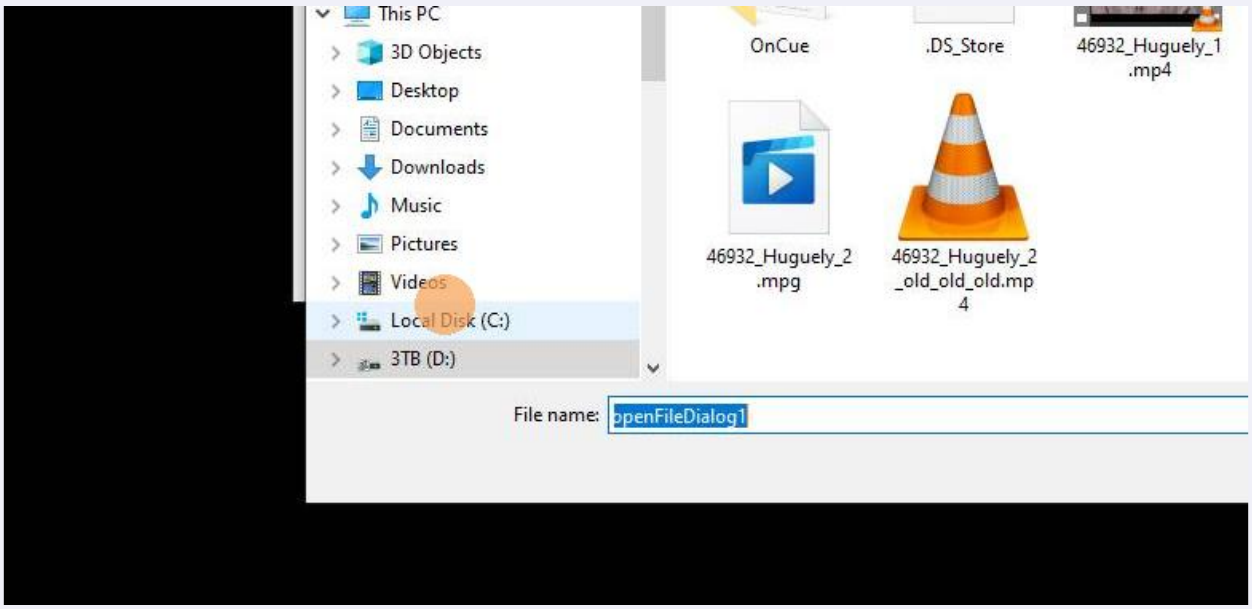
15 Click "Help Documentation"



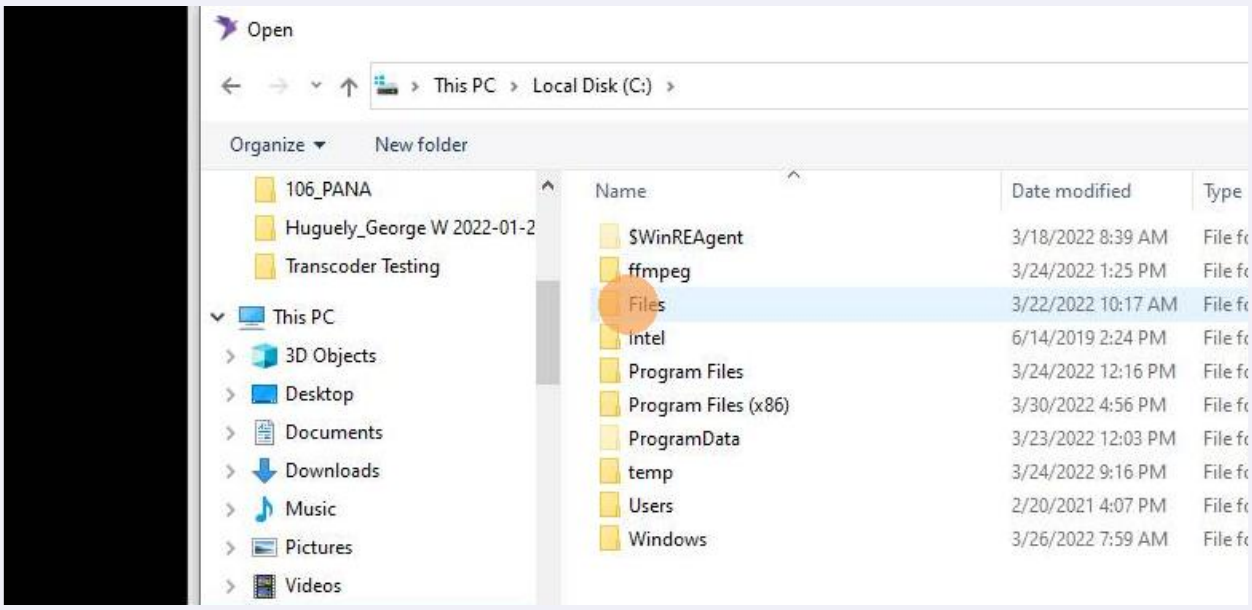
16 Click "..."



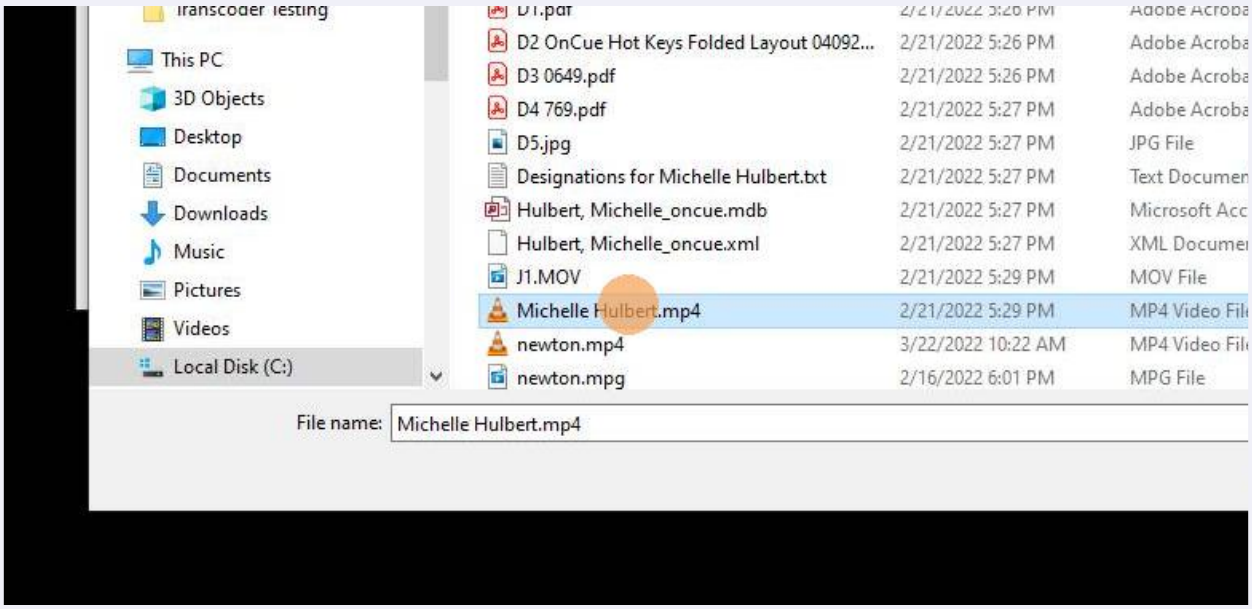
17 Browse to the file that you wish to encode.



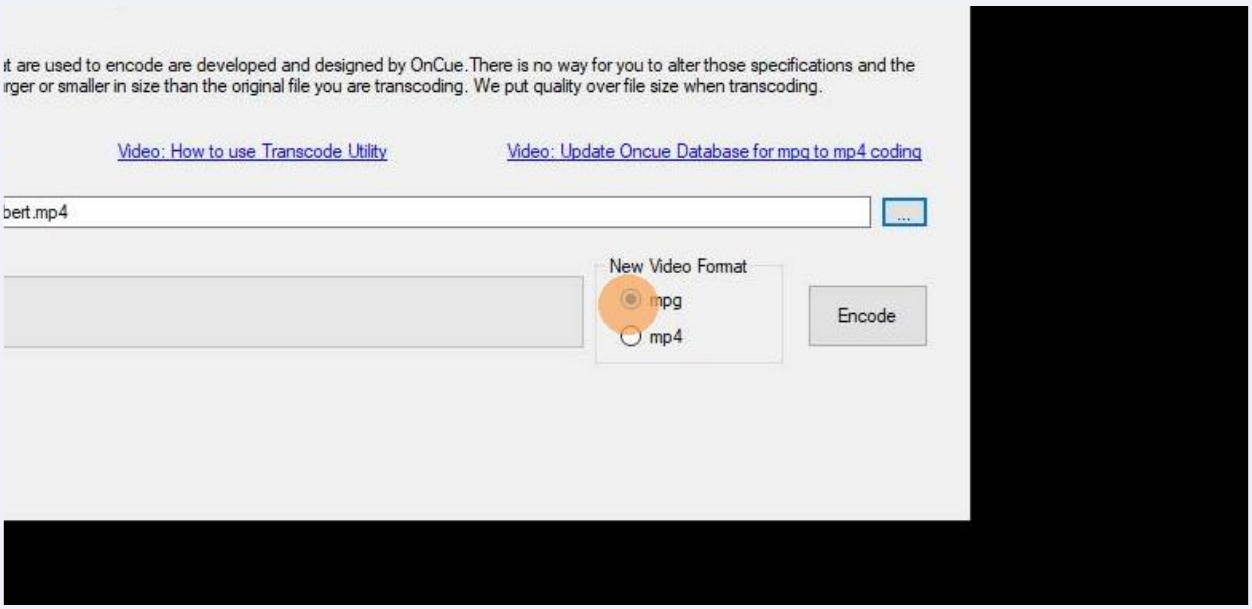
18 Double-click here:



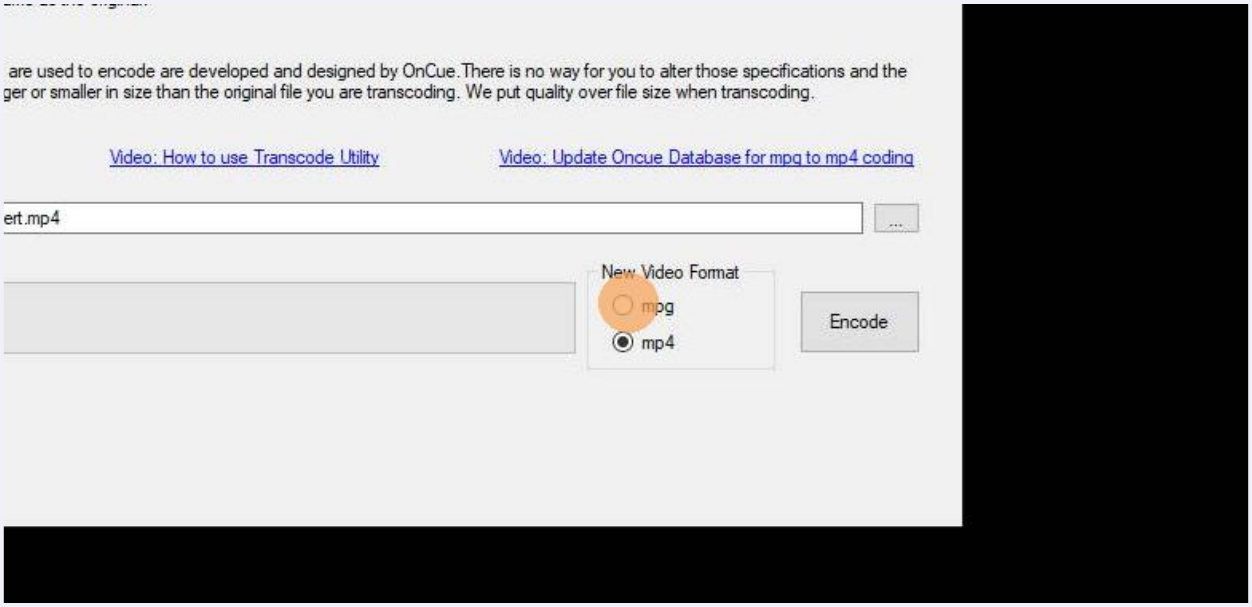
19 Select the file. In this case we are going from MPEG 4 to MPEG 1



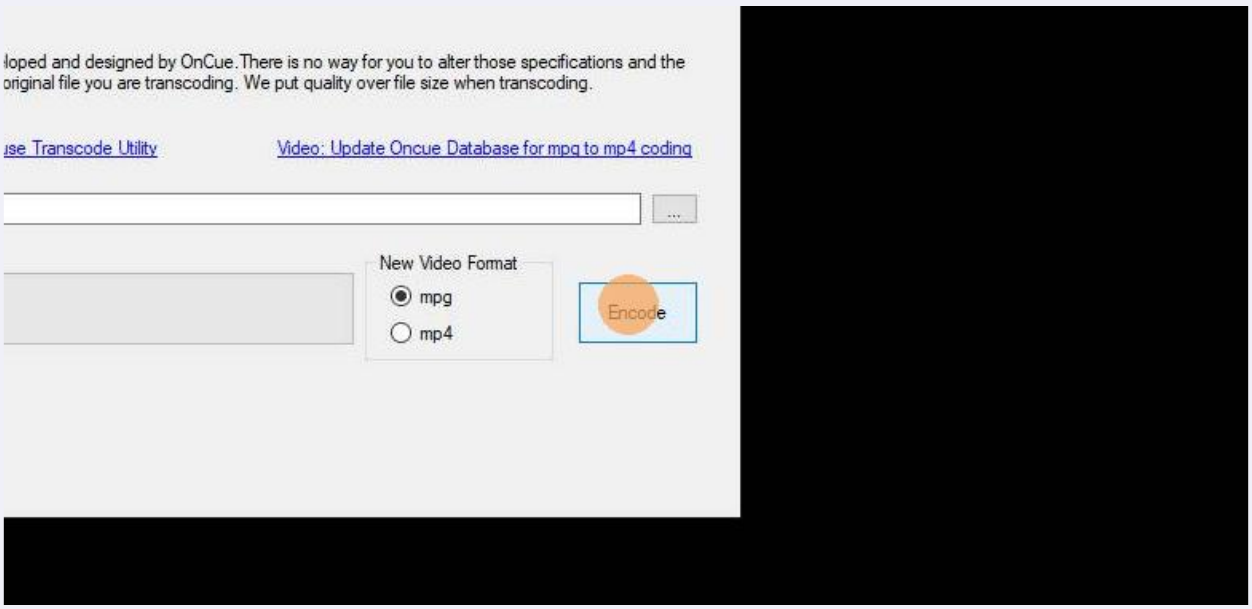
20 Click "mpg"



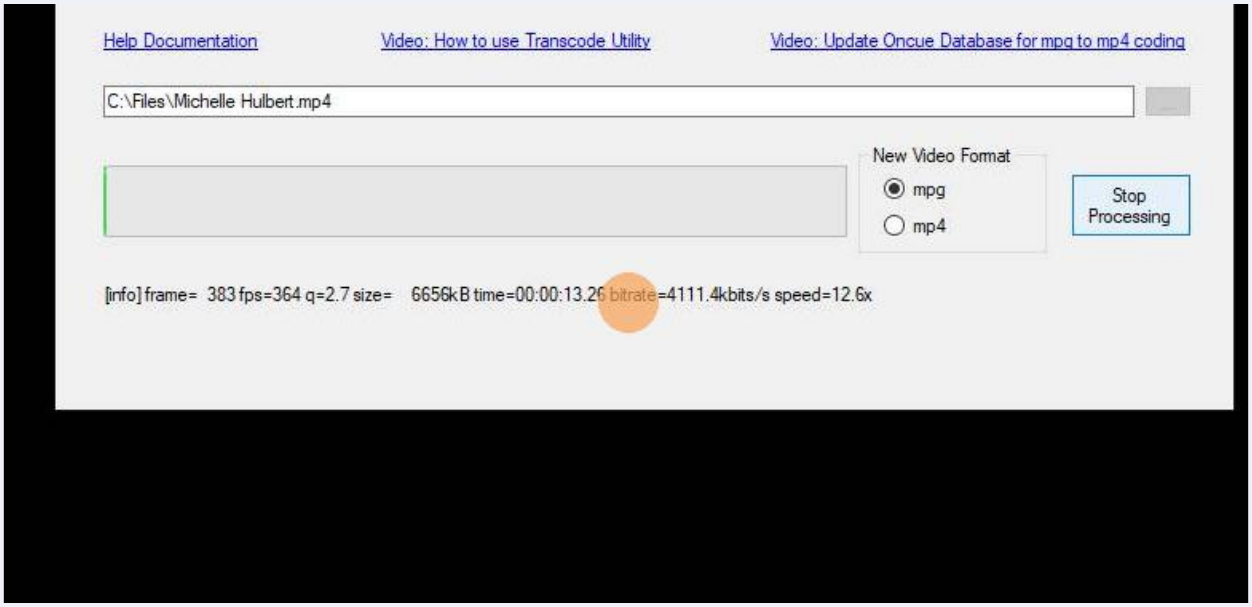
21 Click "mpg"



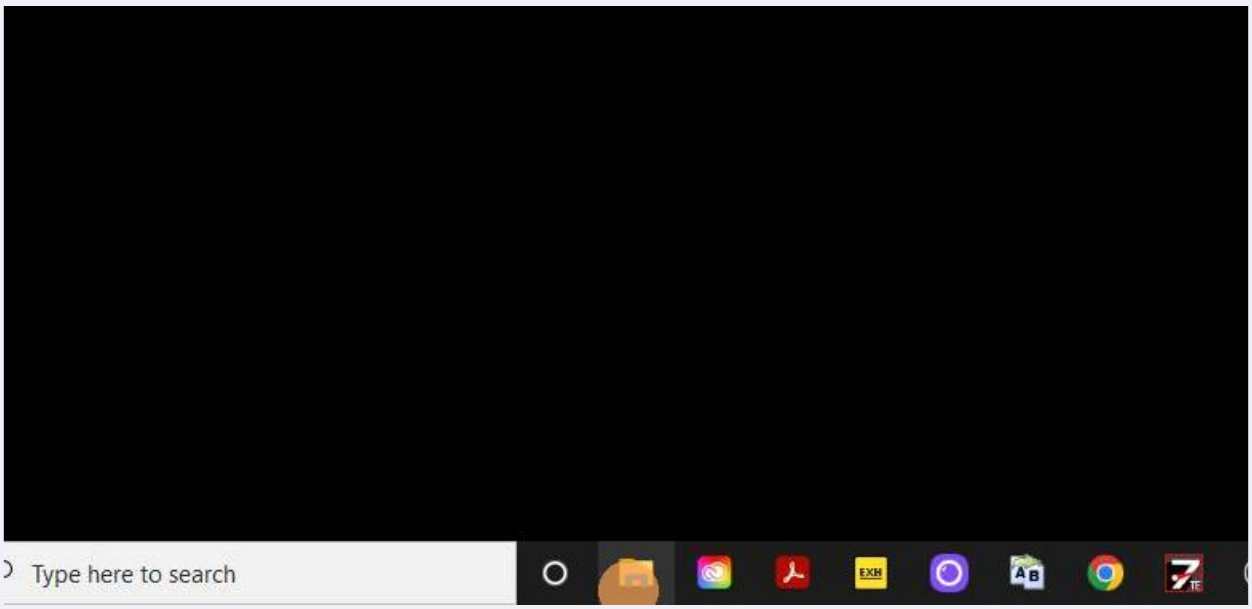
22 Click "Encode"



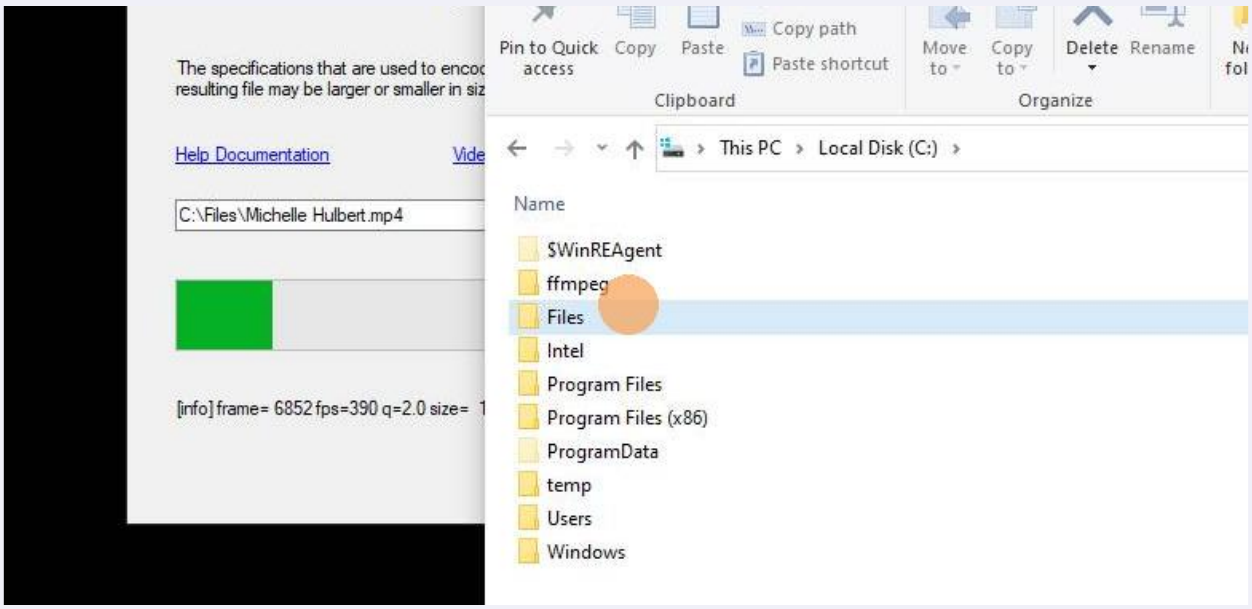
23 The utility will now begin transcoding your video file.



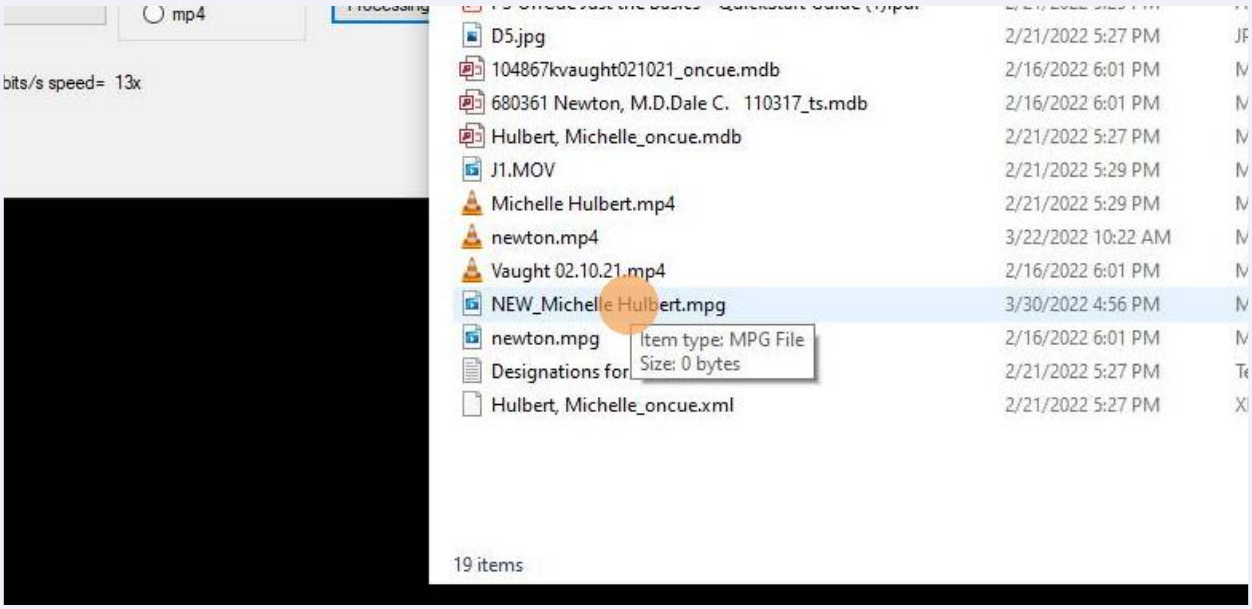
24 Click "File Explorer"



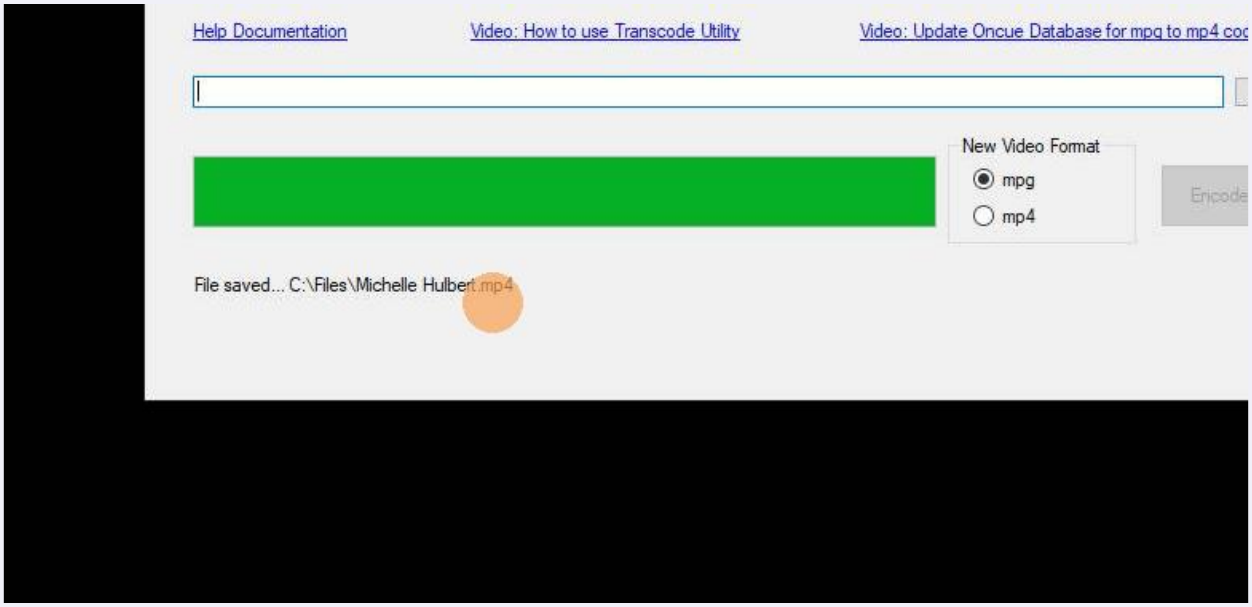
25 Navigate back to where the file was that you are transcoding.

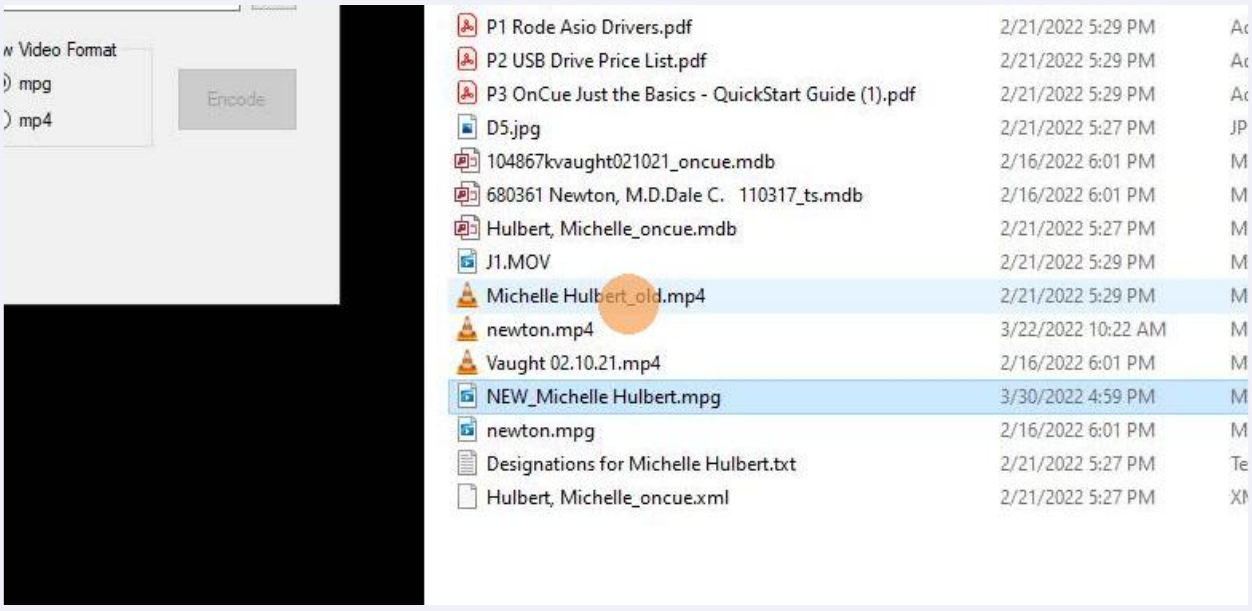


26 You will now see a new MPEG file is being created from the MP4



27 Once complete you will see that the file has been saved.





28 You can see the MP4 now has the name _old and the MPG 1 file has the file name NEW_....simply remove the NEW and add it to your OnCue Case and make sure you update your database to point to an MPG instead of MP4.
